### Legend

Question text

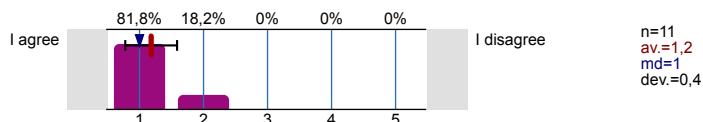

### 1. Personal Information

1.1) Which degree program are you studying?

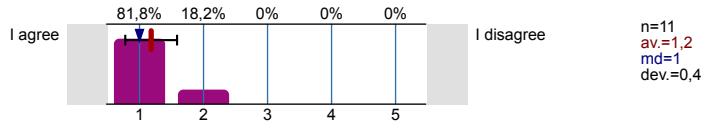

### 2. Quality of the Course

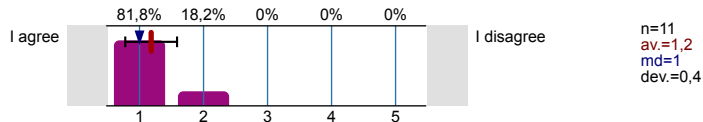

2.1) I have learnt a lot.

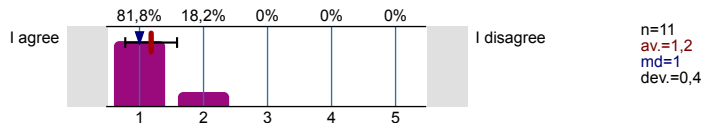

2.2) The course contents were presented in a comprehensible way.

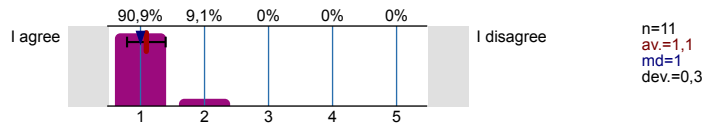

2.3) I had sufficient opportunities to apply the learnt topics.

2.4) The course level was appropriate.

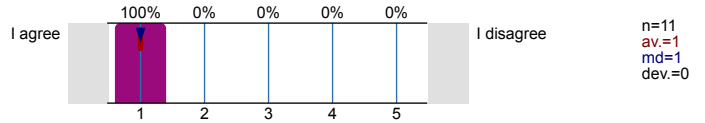

2.5) The quantity of taught material was appropriate.

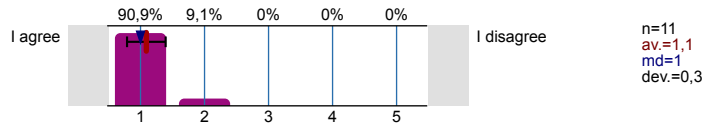

### 3. Commitment of the lecturer

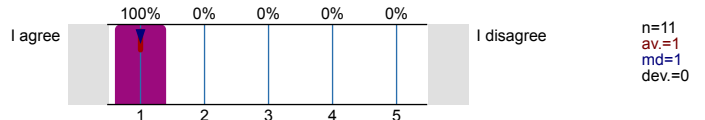

3.1) The lecturer is able to raise my interest in the considered topics.

3.2) I felt well supervised.

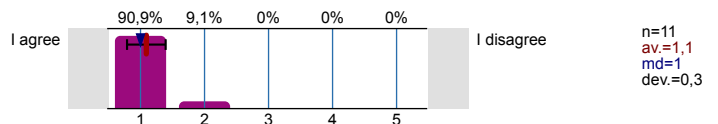

3.3) I received constructive feedback on my performance.

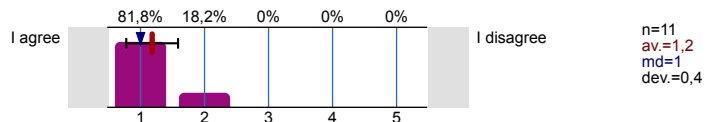

### 4. Student's Commitment

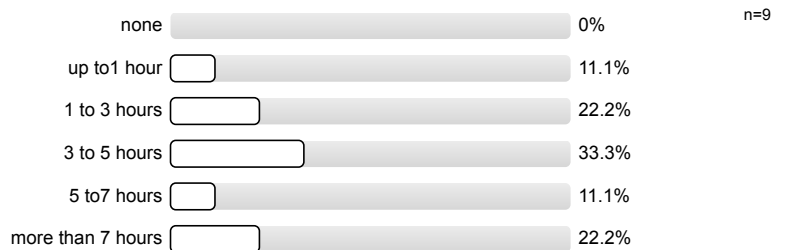

4.1) I specifically spent time to prepare the contents of the lecture.

4.2) The students contributed to the success of the course by being prepared and their active participation.

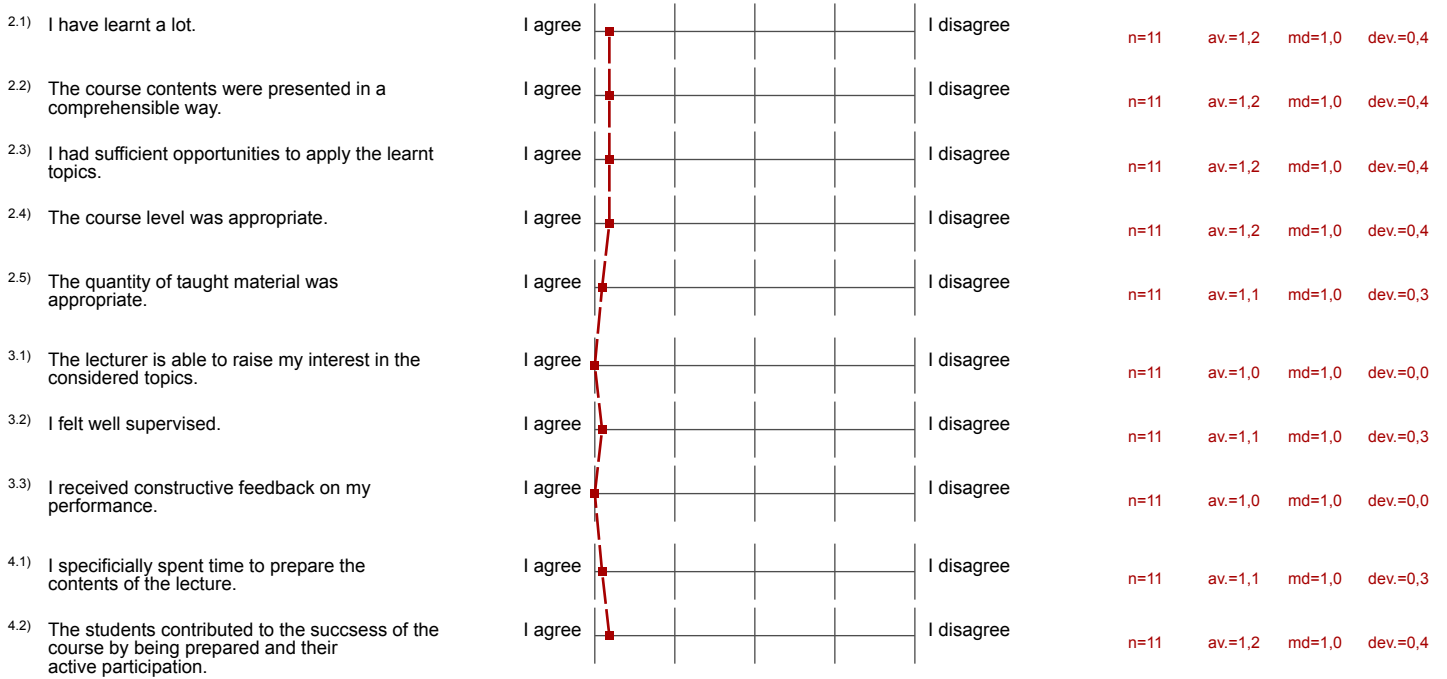

4.3) How many hours per week do you invest in preparing and revising course material?  
(Not counting the time of the lecture itself and preparation for exam)

# Profile

Subunit: MNF-Sektion Biologie  
 Name of the trainer: Dr. Alexander Klimovich  
 Name of the course: Developmental Biology of Marine Invertebrates ((biol235) Practice)  
 (Name of the survey)

Values used in the profile line: Mean

## Comments Report

---

### 5. Remarks on the course or the lecturers

5.1) What did you not like? Is there anything that can be improved?

- Best course ever. Thank you so much!!

5.2) What did you like?

- For me it was the first excursion. And in my opinion it was perfect!  
It was a very interesting excursion on a beautiful island. It helped me a lot to get a better view on the development and evolution of marine invertebrates on its whole complexity.  
I really enjoyed the time in Helgoland with the group!
- I liked the way the course was conducted by you (Alex). And how Igor added to it. And the location was great.
- I really enjoyed the friendly atmosphere and I learned a lot while listening to the presentation. I think the paper selection and the topics were really interesting and informative.  
I think this was one of the best modules I had so far
- It was a course, in which I learned much more than just information about the topic. We had the space to understand and discuss the topics and to learn better how to work on scientific questions. We were always encouraged to do our own thinking. In addition, the different information was not presented in isolation, but was linked together and thus placed in a larger context. So this course was very enriching on many levels.
- The diversity of marine invertebrates especially.
- The relaxed atmosphere and the added support from Igor. Nice discussions and all. Thanks a lot
- Viel Freiheit sich einzubringen  
Hohe Motivation der Betreuer viel zu zeigen  
Abwechslungsreich Fieldwork und Lab  
Viele verschiedene Felder
- Whole concept, all the talks and discussions that were held in the intermediate time, to address personal issues regarding the academic career. Felt well supervised and would attend any time again! Learned a lot also about topics that weren't part of the actual course.  
Appreciated the course deeply!
